Introduction to natural language processing concepts

30 min • Module • 7 Units

Module assessment passed

[Feedback](#)

Beginner

AI Engineer

Data Scientist

Developer

Solution Architect

Student

Microsoft Foundry

Natural language processing (NLP) supports applications that can analyze text to infer semantic meaning.

Learning objectives

Explore concepts and techniques for text analysis.

[Add](#)

Prerequisites

A basic understanding of machine learning and AI concepts.

This module is part of these learning paths

AI concepts for developers and technology professionals

Introduction

1 min

Tokenization

3 min

Statistical text analysis

3 min

Semantic language models

4 min

Exercise - Explore text analytics

15 min

Module assessment

3 min

Summary

1 min

Module assessment

Assess your understanding of this module. Sign in and answer all questions correctly to earn a pass designation on your profile.
